

almost as hard with one hand, as they use the other only to guide the bat.

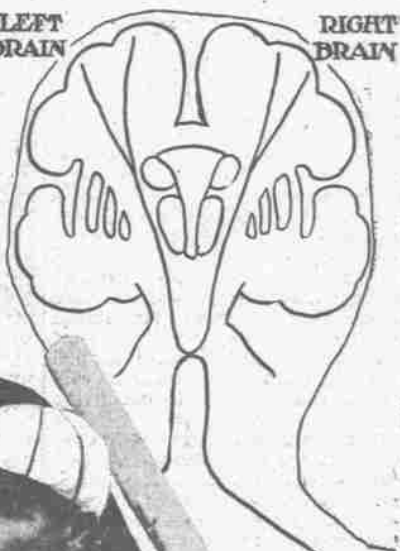

Additional testimony is that they could see just as well if the eye nearest the pitcher was blindfolded.

The natural right-handed batter stands on the far side of the plate because he is right-eyed. He could put more force into his swing hitting from the opposite side. Batting on the far side, he brings his best eye

LEFT
BRAIN

RIGHT
BRAIN

Above, Eddie Collins is shown with his left hand off the bat, putting power into his swing by pulling the bat around with his right hand. Below are Collins' hands, the right gripping the bat tightly, the left grasping it

loosely. At the right is Bob Bescher pulling the bat with his right hand, his left grasping it loosely. Above Bescher, is shown how the left half of the brain controls the right side of the body and vice versa through the nerve fibers.
